Seals & Fittings

# **CLEVERFIT Radial Coupling**

Romania - Purmo

- Enhanced Durability
- Leak-Before-Press
- User-friendly Installation
- Versatile Application
- · Certified Safety

#### Description

CLEVERFIT Radial Coupling features a robust PPSU body, ensuring durability under high stress and temperatures. With deep-seated O-rings and a special viewing window, it simplifies installation while guaranteeing a reliable seal. The "Leak Before Press" functionality helps detect unpressed connections early, preventing costly future repairs. Suitable for various applications, it meets rigorous certifications for drinking water safety.

#### Area of Application

CLEVERFIT Radial Coupling is suitable for heating and water supply systems. It's ideal for both cold and hot water installations, with a temperature range up to 90°C and project pressure up to 10 bar. Certified for drinking water systems in compliance with DIN EN 21003, DVGW and local standards.

#### Selection Criteria

Select based on system specifications for pressure and temperature. Use our design service or brochure for guick selection.

#### **Basic User Instructions**

To install CLEVERFIT Radial Coupling, ensure the pipe is cut square, calibrated, and the edges are deburred. Insert the pipe fully into the coupling until it reaches the inspection window. Use appropriate jaw profiles to press the connection securely. Verify the connection by checking for any leaks.

#### Prescription text specifiers

The CLEVERFIT Radial Coupling is made from robust PPSU, resistant to high stress, temperatures up to 90°C, and pressures up to 10 bar. It features deep-seated O-rings, ensuring secure and durable connections, a special viewing window for installation verification, and the Leak-Before-Press function to detect unpressed fittings. This coupling is suitable for both heating and potable water systems, compliant with DVGW and PZH certifications for drinking water applications. Use the Multitool function to apply TH and U profiles for pressing connections. Available in diameters from 16mm to 32mm.

#### Warranty

## **Specification**

Feature	Unit	Value
