Convectors & Fan Coils

Back panel for iVector

Romania - Purmo

- Aesthetic enhancement

- Compatibility

- Easy installation

- Durability

- Professional finish

Description

This Rear Metal Cover Panel is suitable for iVector S2 fan convectors installed in front of windows. It ensures the inner unit remains hidden, contributing to a neat and professional installation. Compatible with both 2-pipe and 4-pipe versions for models VS-7 to VS-15, it is an essential accessory for aesthetically conscious installations.

Area of Application

The Rear Metal Cover Panel for iVector S2 is ideal for covering fan convectors installed in front of windows. It fits both 2-pipe and 4-pipe units, such as VS-7, VS-9, VS-11, VS-13, VS-15 models. This panel ensures the inner unit is concealed, maintaining aesthetic appeal while providing protection.

Selection Criteria

For selecting the appropriate Rear Metal Cover Panel for your iVector S2 unit, refer to our design service, or use our brochure for quick selection.

Basic User Instructions

Install the Rear Metal Cover Panel on iVector S2 units that are positioned in front of windows to hide the inner unit from view. Ensure that the panel is compatible with the specific model and pipe configuration, either 2-pipe or 4-pipe (VS-7, VS-9, VS-11, VS-13, VS-15). Secure the cover panel evenly to maintain optimal performance and appearance.

Prescription text specifiers

The Rear Metal Cover Panel for iVector S2 is used to conceal the rear of fan convectors positioned in front of windows. Suitable for models VS-7, VS-9, VS-11, VS-13, VS-15, it enhances aesthetic appeal by hiding the unit's inner workings. Compatible with both 2-pipe and 4-pipe configurations, this durable cover ensures a professional and sleek installation. For product selection or additional information, refer to our design service or brochure.
