WZS Mounting Kit

Romania - Purmo

- Complete Kit
- Anti-Lift Security
- Versatile Compatibility
- Optimal Distance
- Easy Installation

Description

The WZS Mounting Kit includes everything needed for safe and efficient panel radiator installation: MCW-7 rails with anti-lift security, screws, plugs, nipples, and adapters, all neatly packed in a carton. It supports radiator lengths from 400 to 3000 mm and heights from 300 to 900 mm, ensuring a 31 mm distance from the wall for optimal heat distribution. The comprehensive kit simplifies the installation process, providing a reliable and long-lasting mounting solution.

Area of Application

WZS Mounting Kit is ideal for securely installing panel radiators within the length range of 400-3000 mm. Suitable applications include residential buildings, commercial spaces, and institutions where reliable radiator installation is required. Suitable for radiators at varying heights from 300 mm to 900 mm. Ensures a fixed distance of 31 mm from the wall for proper heat circulation. Compatible with various wall types using appropriate fixings.

Selection Criteria

Select WZS Mounting Kit based on radiator length and height (400-3000 mm lengths and 300-900 mm heights). Consult our design service or use our brochure for quick selection.

Basic User Instructions

Ensure all components are present before beginning installation: MCW-7 rails, screws, plugs, nipples, and adapters. Fix the MCW-7 rails to the radiator with anti-lift security. Use the provided screws and plugs to anchor the rails to the wall, maintaining a 31 mm gap between the radiator and the wall. Follow the manual for precise instructions to avoid improper installation. All components are packed and ready for use.

Prescription text specifiers

The WZS Mounting Kit is designed for mounting panel radiators ranging from 400-3000 mm in length and 300-900 mm in height. It includes 2 to 3 MCW-7 rails, screws, plugs, nipples, and adapters with a detailed manual for proper installation. The anti-lift security on the rails adds stability, ensuring the radiator stays securely in place. The kit maintains a 31 mm gap between the radiator and the wall, promoting ideal heat distribution. Components are packed in a carton box, accompanying the radiator. This complete solution simplifies installation across various building types.

Warranty

Warranty 2 years
