Panel Radiators

Ramo Flex

Romania - Purmo

- Instalare flexibilă
- Material de înaltă calitate
- Design Estetic
- Dimensiuni Versatile
- Culi standard și personalizate disponibile

Descriere

Ramo Flex, fabricat din oțel laminat la rece de calitate superioară cu conținut scăzut de carbon, respectă cele mai înalte standarde de calitate. Panoul său frontal are indentări orizontale subtile care îi îmbunătățesc estetica. Datorită conexiunii mediane inferioare și poziției insertului pentru capul termostatic interschimbabil (dreapta sau stânga), instalarea este foarte adaptabilă. Disponibil în diferite înălțimi, lungimi și puteri termice, Ramo Flex se potrivește unei game largi de instalații. Livrat în alb RAL 9016 standard, dar personalizabil în alte culori RAL. Include console de perete, dop, vent și robinet pre-setat.

Domeniul de aplicare

Ramo Flex este ideal pentru spații rezidențiale, de birou și de servicii unde sunt necesare soluții de încălzire estetice și de înaltă calitate. Funcționează bine în sisteme de încălzire centralizată cu presiune de până la 10 bar și temperatură de 110°C, oferind flexibilitate la instalare datorită conexiunii centralizate și poziției variabile a termostatului.

Criterii de selecție

Pentru o selecție precisă a produsului, luați în considerare dimensiunile, capacitatea de încălzire și tipul de conexiune. Folosiți serviciul nostru de design sau broșura pentru o selecție rapidă.

Instrucțiuni de bază pentru utilizator

Radiatoarele Ramo Flex trebuie instalate în sisteme de încălzire centralizată sigilate. Asigurați-vă că sistemul este lipsit de substanțe corozive pentru a preveni deteriorarea. Radiatoarele vin cu suporturi de montare necesare, vent și robinet ventil presetats preinstalate. În timpul instalării, deschideți ambalajul doar unde este necesar pentru a evita deteriorarea. Curățați și clătiți bine sistemul înainte de utilizare. Urmați toate standardele de siguranță și reglementările locale în timpul instalării.
