

Intratherm Abdeckroste

Austria - Vogel & Noot

- Zwei Ausführungen der Abdeckungen als Standard-Rollrost oder auch als Linearrost
- Hochwertige Materialien wie Eiche, Buche, Aluminium oder Edelstahl
- Ohne Rahmen oder mit L-, U- oder Z-Rahmen erhältlich

Beschreibung

Intratherm Abdeckroste ermöglichen einen optimalen Übergang zwischen Fußboden und Konvektorwanne. Alle Rahmen werden in identischen Farbtönen abgestimmt auf die Aluminiumroste angeboten.

Anwendungsbereich

Abdeckgitter für INTRATHERM Konvektoren. Mögliche Ausführungen in Buche oder Eiche, Aluminium und Edelstahl, können als Standard Rollrost oder auch als Linearrost geliefert werden

Auswahlkriterien

Die Abdeckgitter der Intratherm-Bodenkonvektoren sind in der Ausführung ohne Rahmen oder in der Ausführung mit L-, U- oder Z-Rahmen erhältlich. Aufgrund der unterschiedlichen Längen der Lamellen in der Ausführung mit Rahmen im Vergleich zur Ausführung ohne Rahmen (für Konvektoren gleicher Breite) müssen alle Rahmen zusammen mit den Abdeckgittern bestellt werden. Die Rahmen L, U und Z sind in allen Farbvarianten erhältlich, ebenso wie die Abdeckgitter aus Aluminium. Rahmen in den Ausführungen Holz oder Edelstahl können nicht gefertigt werden.
