

- Hogedrukcapaciteit
- Flexibele Aansluitingen
- Eenvoudige hydraulische balans
- Stabiele Bevestiging
- Aanpassingsmogelijkheden beschikbaar

## Beschrijving

Integra Ramo HP is een universeel aansluitbare radiator radiator met een vlak, fijn-geprofileerd voorpaneel, een geïntegreerd leidingensysteem en 6 aansluitingen. Deze configuratie maakt zowel een elegante aansluiting mogelijk via een onderaansluiting met de thermostaatkop rechts, als een klassieke aansluiting via de 4 zijpoorten.

Met een werkdruk van 10 bar kan hij worden geïntegreerd in een hogedruksysteem, wat vereist is in hoogbouw of in gebouwen aangesloten op het stadsverwarmingsnet. Gekleurde, vooraf ingestelde thermostatische inzetstukken maken hydraulisch balanceren eenvoudig. Elke kleur vertegenwoordigt

de Kv-waarde als functie van het waterdebiet dat nodig is om de vereiste warmteafgifte te bereiken en een correcte hydraulische balans te verzekeren. Als er aanpassingen nodig zijn, kan de instelling snel en eenvoudig worden aangepast.

De nieuwe MCW-7 beugels met een aangepaste anti-liftvoorziening zorgen voor een stabielere montage en positionering van radiatoren op muren en beschermen ze tegen zijwaarts verschuiven.

Integra Ramo HP is verkrijgbaar in de standaardkleur RAL 9016. Andere kleuren zijn verkrijgbaar op aanvraag. Voor radiatoren in speciale kleuren zijn accessoires zoals de ontluchter, het kapje en de decoratieve clip verkrijgbaar in zilver RAL 9006 voor een moderne, meer esthetische look. Een hoogwaardig bovenrooster en twee stijlvolle zijkappen zijn voorgeïnstalleerd in de fabriek.

## Toepassingsgebied

Integra Ramo HP is geschikt voor hogedrukverwarmingssystemen, hoogbouw en stedelijke verwarmingsnetwerken. De radiator werkt tot 10 bar druk en 110°C, met een vlak voorpaneel, geïntegreerd leidingensysteem en meerdere aansluitpunten voor veelzijdige installatie.

## Selectiecriteria

Gebruik onze ontwerpdienst voor selectiegids. gebruik onze brochure voor snelle selectie.

## Basis gebruiksinstructies

Zorg ervoor dat alle hydraulische systemen in balans zijn voor installatie. Gebruik de vooraf geïnstalleerde thermostatische inzetstukken voor efficiënte werking door de vereiste Kv-waarden te matchen. Monteer de radiator met de meegeleverde MCW-7 steunen voor stabiliteit en bescherming tegen zijwaartse bewegingen. Zorg ervoor dat alle fittingen en afdichtingen correct zijn geplaatst voordat u het systeem onder druk zet.

## Specificatie van receptteksten

Integra Ramo HP is een hoogwaardig presterende radiator ontworpen voor hogedrukverwarmingssystemen. Het ondersteunt een maximale werkdruk van 10 bar en een temperatuur van 110°C. De radiator heeft een vlak voorpaneel, geïntegreerd leidingensysteem en veelzijdige aansluitpunten, waaronder onderste en laterale aansluitingen. Het maakt gebruik van voorgekleurd, vooraf ingestelde thermostatische inserts voor eenvoudige hydraulische balans. De MCW-7 montagebeugels zorgen voor een veilige en stabiele installatie. Standaardkleur is RAL 9016, met andere opties op aanvraag. Accessoires zijn onder andere ontluchters, doppen en decoratieve clips in zilver RAL 9006

## Garantie
