# Hygienic HP

Belgium - Radson

Hygienic HP stalen paneelradiator is vervaardigd uit koudgewalst hoogwaardig plaatstaal volgens EN10130 en wordt geleverd met een geprofileerde voorplaat, maar zonder convectielamellen.

Aangezien dit model geen boven- of zijkappen heeft, is het zeer geschikt voor gebruik in omgevingen met hoge hygiënische eisen, zoals ziekenhuizen of woonzorgcentra.

De Hygienic HP kan worden gebruikt met een werkdruk van 10 bar, waardoor u deze radiator overal kunt plannen en installeren waar een hogere systeemdruk vereist is. Bijvoorbeeld in grotere systemen, hogere gebouwen of in gebouwen die zijn aangesloten op stadsverwarming.

De nieuwe MCW 7 beugels met gewijzigde anti-lift voorziening zorgen voor een stabielere montage en plaatsing van de radiator aan de muren en beschermen tegen zijdelings schuiven.

De Hygienic HP is verkrijgbaar in de standaard kleur RAL 9016 (wit). 70 andere kleuren zijn beschikbaar op aanvraag.

Voor radiatoren in speciale kleuren zijn de accessoires zoals ontluchter en stop verkrijgbaar in zilver RAL 9006 voor een moderne en betere esthetische uitstraling
