Panel Radiators

Ulow E2

UK - Myson

- Super efficient radiator
- Ideal for low-temperature heating systems
- Integrated fan
- Electronic thermostatic actuator
- Low noise

Description

The Myson Ulow E2 fan-assisted radiator is the ultimate choice when it comes to intelligent, low temperature heating. It uses in-built fans to force convection and produces heat outputs up to 60% more than traditional radiators. It has intelligent controls allowing the fans to work on a sliding scale where the water temperature must be 3°C higher than the set point. It is highly flexible, utilising central connection technology, and has a "summer breeze" function for air circulation on warm days. Double panel, as standard, with factory fitted top grille and side panels.

Area of Application

The Ulow E2 is ideal for low-temperature heating systems, offering both heating and cooling functionality. It is highly suitable for rooms needing more heat output from a panel radiator and features intelligent controls. Optimal for hydronic systems, it includes central connection technology, making it versatile for both residential and commercial applications.

Selection Criteria

Available in heights of 600mm and lengths from 400mm to 2000mm. Each size offers 3 heating modes.

Basic User Instructions

Install the Ulow E2 radiator with an electronic actuator for easy control. A central connection twin entry valve, nut, and olive pack are supplied separately. The built-in controls and fans should be used for optimal performance in both heating and cooling modes. Ensure proper maintenance and cleaning of the unit to maintain its efficiency. Wall brackets are included for secure mounting. Switch to air circulation mode during warm days to utilize the "summer breeze" function.

Prescription text specifiers

The Ulow E2 is a premium fan-assisted radiator designed for low-temperature heating systems. Available at heights of 600mm and lengths between 400mm to 2000mm, it incorporates intelligent controls and built-in fans to enhance heat distribution and performance. Capable of producing up to 60% more heat than traditional radiators, it features central connection technology for flexible installation and maintenance. Suitable for hydronic heating applications in both residential and commercial settings, the Ulow E2 ensures efficient and rapid heating. The radiator also includes a "summer breeze" mode for air circulation during warmer months, adding to its versatility. It comes with a factory-fitted top grille and side panels, and uses a white electronic thermostatic actuator for precise temperature control.

Warranty

For your additional peace of mind, Purmo Group gives the following Warranty against manufacturing defect. Your statutory rights are not affected by this Warranty.

Subject as provided below, Purmo Group warrants to the original purchaser at the original installation site that its products will be free from defects in materials and workmanship for the following periods:

- Hydronic Radiators: 10 years from date of purchase.*
- Fan Assisted Radiators (ULOW-E2): 2 years from date of purchase.*
- Fan Convectors: 2 years from date of purchase.
- Hydronic Underfloor Heating: 10 years for the pipe from date of purchase.
- Hydronic Underfloor Heating: 2 years on accessories, actuators, ball valves, controls, expansion vessels, fittings, low loss headers, manifolds, mixer control groups & tooling from date of purchase.
- Hydronic Underfloor Heating: 12 months on all pumps from date of purchase.
- Electric Underfloor Heating: 10 years from date of purchase (except programmer & sensor).
- Electric Radiators: 10 years from date of purchase on radiator unit*, electric controls & electronic components; 2 years from date of purchase.*
- Electric Towel Warmers: 2 years from date of purchase.*
- Hydronic Towel Warmers: 5 to 10 years from date of purchase depending on product type.*
- Myson Radiator Valves and Controls: 2 to 5 years from date of purchase, depending on range.

*Products which are exposed to prolonged extreme conditions, such as high humidity or severe

cold/condensation, may be subject to deterioration. This is not a result of any manufacturing defect. Products installed in these circumstances will be subject to a warranty period of twelve months only.

The original purchaser's remedy for breach of this Warranty is expressly limited to repair or replacement of any part or parts found to be defective under conditions of normal service and use during the above Warranty period and does not extend to Purmo Group being liable for any incidental, special or consequential damages or losses whatsoever, such as loss of use of the product, inconvenience or lost profits.

This Warranty does not cover any defect, damage or malfunction in the product which is due to: failure to comply in any respect with Purmo Group's installation, maintenance or operating instructions; faulty storage,

handling, installation or repair; mis-use; neglect; accident; abuse; or general wear and tear.

Before this warranty can be activated, the original purchaser will be required to prove, with supporting documentation, the date and place of purchase, as Purmo Group may need to conduct its investigation into

the alleged defect. This should be within 28 days of the date when the defect was discovered or ought to have reasonably discovered the defect.

Purmo Group reserves the right to make a reasonable charge for inspecting and testing any product which is subject to a Warranty claim and the rights conferred by the Warranty are conditional upon the payment of such charge. The charge may be made, at Purmo Group's discretion, either before or after the inspection and testing of the product. In the event that it is established to Purmo Group's reasonable satisfaction that a valid Warranty claim has been made in respect of the product, then any inspection charge which has been paid will be refunded in full by Purmo Group.
